

EDUCATION

Connecting students and Bridging Borders in Seini and Kalush

The problem. Project's solution

Schools in Seini (RO) and Kalush (UA) struggle with outdated infrastructure, limited digital tools, poor accessibility for students with special needs, and few intercultural activities. This project responds with a modern, inclusive approach: equipping schools with smart technology, upgrading outdoor learning and sports facilities, improving accessibility, and fostering cross-border cooperation through joint educational and sports events –creating engaging, inclusive, and future-ready learning environments for all students.
