NEXT Romania – Ukraine

ALERT

The problem. Project's solution

The border regions of Romania and Ukraine face rising challenges from cross-border crime, including trafficking, smuggling, and cybercrime, intensified by regional instability and outdated forensic infrastructure. The ALERT project strengthens law enforcement capacities through advanced mobile forensic units, modern investigation software, and joint training programmes. By promoting cross-border cooperation, technology integration, and skill development, it enhances investigation efficiency, public safety, and trust in judicial systems.
